2026 Pneumococcal Vaccine (Streptococcus pneumoniae vaccine) Advocacy and Promotion Plan

School of Public Health, Jilin University

School of Public Health Jilin University

JILIN UNIVERSITY · SCHOOL OF PUBLIC HEALTH

I. Basic Activity Information

- Name of the Activity: Pneumococcal Vaccine Protection Advocacy
- Activity Theme: Strengthening the Respiratory Defense, Safeguarding Infant Health
- Activity Type: ☐ Educational Science Popularization ☑ Public Welfare Service ☐ Cultural Promotion ☐ Community Service ☐ Other:
- Organizer: JLU-SPH Team

II. Purpose of the Activity

1. Core Objective: Enable parents of infants and young children (especially first-time parents) to quickly recognize the importance of the pneumococcal vaccine in preventing invasive pneumococcal diseases in infants and young children. Enhance parents' awareness and compliance regarding vaccination against Streptococcus pneumoniae , and dispel unnecessary concerns.
2. Specific Goals:

○ Knowledge/Cognition: Inform parents that Streptococcus pneumoniae is a major pathogen responsible for severe bacterial pneumonia, meningitis, and other serious infections in infants and young children. Provide information on the immunization schedule, necessity, and safety of pneumococcal vaccines.

○ Emotional/Attitudinal: Increase parents' awareness and willingness to comply with pneumococcal vaccination, and alleviate unwarranted worries.

3. Expected Outcomes:

○ Reach: Approximately 40–50 individuals.

○ Satisfaction Rate Target: Over 90%

○ Number of on-site consultations regarding vaccine-related questions ⩾ 8, leaflet distribution rate 100%

III. Target Audience

- Core Audience: Parents of newborns, prospective parents, parents of newborns about to be discharged, and caregivers.
- Audience Characteristics: Primarily first-time parents, highly concerned about infant health and vaccination, may have doubts regarding vaccine safety. Limited time in medical facilities, requiring rapid access to key information.

IV. Activity Time and Venue

- Date of Activity: March 28, 2026
- Total Duration: Approximately 40 minutes
- Venue: Outpatient Hall, Changchun Maternal and Child Hospital

V. Activity Content and Process

【Overview of Activity Process】

Phase	Time	Module Name	Specific Content	Responsible Personnel	Required Materials/Key Items for Photography
Phase	10 min	Venue Setup	Leaflet stand placement, poster display, material arrangement	Logistics	Leaflets, small posters, adhesive tape
Main Phase	20 min	Leaflet Distribution + Brief Lecture	Distribute brochures to parents and explain, in layman's terms, the hazards of Streptococcus pneumoniae (commonly referred to as "pneumococcus") as well as the basic immunization schedule of the pneumococcal conjugate vaccine (PCV13, Pneumococcal Conjugate Vaccine 13-valent). Provide answers to basic questions.	Lecturer	Leaflets
Closing Phase	20 min	Venue Restoration + Material Organization	Collect remaining leaflets, check poster display status, organize consultation registration book	Logistics	Storage bags, registration book

【Detailed Description of Each Module】

- Module 1: Leaflet Distribution
  - **Core Content:** Politely hand over leaflets to parents of infants in the ward/outpatient hall, highlighting the key message in 1–2 sentences: “Hello, this leaflet contains information regarding the prevention of pneumonia and meningitis in infants and young children with the pneumococcal vaccine. After birth, timely vaccination is essential to effectively prevent severe infections caused by Streptococcus pneumoniae, creating a strong foundation for your child’s healthy development. Please take a moment to review.” Briefly explain the vaccination schedule (such as primary immunization at 2, 4, and 6 months of age) and its necessity.

- Key Messaging: Emphasize “prevention of invasive pneumococcal diseases,” “basic protection,” and “prevention of severe complications.” Use phrases such as “Infants have immature immune systems; timely vaccination is among the most effective methods to protect them from serious bacterial infections,” to resonate with parental concerns. Explain that Streptococcus pneumoniae is a common pathogenic bacterium.
- Key messaging: Emphasize "preventing invasive pneumococcal disease," "basic protection," and "preventing severe complications"; use phrases such as "Because babies are small and have weaker immune systems, timely vaccination is one of the most effective ways to protect them against serious bacterial infections" to resonate with parents' concerns. Explain that Streptococcus pneumoniae is a common pathogenic bacterium.

VI. Personnel Allocation and Responsibilities

- **Overall Coordinator (1 person):** Responsible for overall coordination, management of process and timing, and handling emergencies. Must have strong communication skills and oversee the entire activity.
- **Lecturer (1 person):** Distribute leaflets, provide explanations, and answer consultation questions according to schedule at the venue.
- **Logistics (2 persons):** Material transportation, site arrangement, and post-event cleaning

VII. Inventory List

- Publicity Materials:
  - Small posters
  - Leaflets (brochures)
- Educational Materials:
  - Activity feedback questionnaires
- Logistics:
  - Adhesive tape
  - Storage bags
  - Standard first aid kit
  - Cleaning wipes, garbage bags

VIII. Risk Contingency Plan

- Personnel risk: Parents exhibit resistance or aversion to publicity. The promotional activity should be immediately ceased, followed by a sincere apology. Only leaflets shall be distributed, with the information, "We will not disturb you further; please feel free to review this at your convenience."
- Venue risk: Temporary venue restrictions prohibit posting of posters. Only manual distribution of leaflets will be used; poster usage will be canceled.

- Order risk: Large numbers of people may cause crowding during the promotional activities. Lecturers shall disperse to different areas, conduct one-on-one low-volume promotion, and avoid gatherings.

IX. Effectiveness Evaluation

- Process evaluation: On-site observation of parents' receptiveness, record the daily quantity of leaflets distributed and consultations received.
- Satisfaction evaluation: Collect completed paper feedback questionnaires and conduct random oral inquiries with parents who have received the promotional information, such as: "Do you clearly understand the core information about the product?" All feedback should be documented.
