2026 《 Visible Protection 》—Geriatric Health Knowledge Publicity Program Plan

School of Public Health, Jilin University

School of Public Health Jilin University

JILIN UNIVERSITY · SCHOOL OF PUBLIC HEALTH

I. Basic Information of the Activity

- Activity Name: "Visible Protection"—Health Knowledge Advocacy Tailored for the Elderly
- Activity Theme: Remember Daily Protection for Lasting Health and Peace of Mind in Old Age
- Activity Type: ☑Public Welfare Service ☑Educational Popular Science ☐Cultural Promotion ☐Community Service ☐Other:
- Organizer: JLU-SPH Team

II. Purpose of the Activity

1. Core Purpose: Through gentle and easy-to-understand explanations and interactions, to popularize basic daily health protection knowledge among elderly residents in nursing homes, enhance their awareness and capability of health management, reduce the incidence of common diseases, and facilitate a peaceful old age.
2. Specific Objectives:

○ Knowledge/Cognitive Level: Enable the elderly to understand and remember core protection points, such as "frequent handwashing, regular ventilation, minimizing gatherings, keeping warm, and maintaining a regular routine."

○ Behavior/Skill Level: Encourage the elderly to integrate this knowledge into daily habits and be able to share it with family and friends.

○ Emotional/Attitudinal Level: Relieve feelings of loneliness in the elderly through companionship and care, convey societal warmth, and boost their confidence in healthy living.

3. Expected Outcomes:

○ Estimated Coverage: Approximately 60 participants.

○ On-site Interaction Participation Rate: ⩾90%

○ Completion of a comprehensive activity process record.

III. Target Participants

- Primary Audience: Elderly residents in nursing homes
- Audience Characteristics: Place emphasis on daily health but have limited acceptance of specialized medical terminology; require gentle, repetitive, and patient communication; some elderly have emotional needs for communication with their children; some have visual impairments and require large-font materials.

IV. Activity Time and Location

- Date: April 10, 2026
- Total Duration: Approximately 60 minutes
- Location:

1. Training and Signing Venue: Nursing Home Conference Room
2. Home-based Service: Rooms of 1–2 elderly residents.

V. Content and Procedure of the Activity

[Overall Activity Procedure]

Phase	Time	Session Title	Specific Content	Responsible Personnel	Required Materials/ Filming Highlights
Phase	15 min	Venue Setup and Personnel Assembly	Arrange the conference room (tables, chairs, projector); invite caregivers on site.	General Coordinator, Logistics Team	Computer, projector
Main Session	20 min	**Session 1: On-site Centralized Explanation**	The moderator will use a large-font version of the PowerPoint presentation (PPT) and, following the designated script, provide a gentle explanation of daily protective measures to the elderly attendees.	Lecturer	**PPT**

Phase	Time	Session Title	Specific Content	Responsible Personnel	Required Materials/Filming Highlights
	20 min	**Session 2: In-room Care and Postcard Completion**	2–3 team members visit the rooms of 1–2 less mobile elderly individuals to provide one-on-one, gentle explanation and companionship. They ask what messages the elderly would like to convey to their children and have team members write these on postcards on their behalf.	Assistant	Postcards, pens
	20min	**Session 3: Postcard Writing and Interaction**	In the main activity area, team members assist elderly individuals who are able to write to complete their postcards, or write on behalf of those who require assistance. Communication is maintained with the elderly throughout the process.	All Team Members	Postcards, pens

[Detailed Description of Each Session]

- **Session 1: On-site Centralized Explanation**
  - **Core Content:** Explanation should be delivered at a gentle and moderate pace. Emphasize the practicality and operability of daily protective measures and avoid specialized terminology.
  - **Precautions:** Ensure that the PPT font size is sufficiently large; the presenter should face the audience, smile, and maintain eye contact.
- **Session 2: In-room Care and Postcard Completion**
  - **Core Content:** Focus on companionship and care. Team members recall and reiterate core protection knowledge in simple terms, and guide the elderly to express messages they wish to send to their children.
  - **Key Phrases:** "Grandpa/Grandma, we're here to check in on you and talk about how to stay healthy and prevent illness …", "Is there anything you'd like to say to your children? I can write it down and mail it for you."
  - **Precautions:** Respect the elderly's wishes and demonstrate patience.
- **Session 3: Postcard Writing and Interaction**
  - **Core content:** A warm and friendly interactive atmosphere. Team members provide one-on-one assistance to the elderly, guiding them to write blessings themselves or, if necessary, writing on their behalf.
  - **Key phrases:** "Grandma, is there anything you would like to say to your children? I can help you write it.", "Would this wording be acceptable to you?"

VI. Personnel Allocation and Division of Responsibilities

- General Coordinator (1 person): Responsible for overall coordination, liaising with the nursing home, and managing workflow and time control.
- Lecturer (1 person): Responsible for delivering the PowerPoint presentation in Section 1; must demonstrate strong approachability, clear expression, and patience.
- Logistics (1–2 persons): Responsible for full-process coordination and materials management. Close collaboration with leaders of each section is required.
- Teaching Assistant (2–3 persons): Responsible for home-visit services (Section 2), assisting the main lecturer, working alongside nursing staff, and completing the task of accompanying the elderly. Patience and good communication skills are essential.

VII. Materials and Equipment List

- Publicity and Promotional Items:
  - Large-font Health Knowledge PPT

- ○ Warm-themed postcards
- ○ Signature pens
- ● Equipment Category:
- ○ Laptop computers, projectors
- ○ Camera/high-definition mobile phone (ensure adequate battery power)
- ● Logistics Category:
- ○ Basic first aid kit
- ○ Postcard collection box

VIII. Risk Contingency Plan

- ● Elderly individual experiencing physical discomfort: Immediately suspend the activity, contact in-house medical and nursing staff, and notify the person in charge.
- ● Equipment malfunction: Prepare backup equipment. If the PPT cannot be played, the presenter will switch to explaining using a large-font printed script.
- ● Crowd control issues: To be gently managed by teaching assistants to avoid congestion.
- ● Communication barriers: Team members must exercise great patience, repeat messages using simpler language; the core focus is on conveying care rather than knowledge assessment.

IX. Effectiveness Evaluation

- ● Process documentation: Photographic materials will serve as the core evaluation evidence.
- ● Satisfaction feedback: Brief post-activity communication with nursing home staff to obtain verbal feedback.
